Quadro e tondo insieme. Due figure opposte: definita e spigolosa una, armoniosa e tondeggiante l'altra. 'Game' rappresenta la fusione di queste geometrie opposte, perché si sa, gli opposti si attraggono creando un qualcosa di unico.

Square and round at the same time. Two opposite figures: one defined and angular, the other harmonious and rounded. 'Game' represents a blend of these opposite geometries because, as we all know, opposites attract one another to create things unique.

Quadratisch und rund. Zwei entgegengesetzte geometrische Figuren: eine ist klar definiert und kantig, die andere ausgewogen und rundlich. 'Game' kombiniert diese beiden gegensätzlichen geometrischen Figuren, da sich bekanntlich Gegenstände anziehen und eine einzigartige Kombination schaffen.

Carré et rond à la fois. Deux figures opposées: définie et anguleuse l'une, harmonieuse et ronde l'autre. 'Game' représente la fusion de ces géométries opposées, puisque nous le savons bien, les opposés s'attirent en créant quelque chose d'unique.

Сочетание квадрата и круга. Две противоположные фигуры: решительная и "угластая" - первая, гармоничная и округлая - вторая. 'Game' представляет собой слияние этих противоположных геометрических фигур, потому что, как известно, противоположности притягиваются, создавая нечто уникальное.
