23 YEARS SHARING IDEAS WITH THE MARKET

Alberto Quintana, Lorena García y Fernando Martínez / Design OLE! Team

En OLE! siempre hemos tenido la inquietud por desarrollar productos que cumplan con el espacio, la luz y la forma, estas tres premisas son el resultado de nuestras colecciones que abarcan diferentes estilos dentro del mundo de la decoración actual y de vanguardia. En las sociedades modernas el concepto hábitat está en constante evolución, las formas no tienen límites y la luz con las nuevas tecnologías abarca una nueva dimensión.

Olé es consciente de esta nueva era y por eso cuenta con un diseño propio o de autor para dar respuesta a sus diseños, en ocasiones para llegar al concepto deseado por la firma se colabora con otros diseñadores. La luz es la otra protagonista de nuestros productos el saber aplicar el diseño en la forma y en la luz, combinación que da como resultado un producto íntegro que nos hace diferentes..

Hugo Tejada / HUGOTEJADA STUDIO Vicente Gallega / GALLEGA DESIGN

“simplicity is the ultimate sophistication”

(Leonardo da Vinci, genius, 1452-1519)

We consider that any light design have 2 main components: light + structure. Both are part of our space.

This catalogue target is giving you useful tools; designs which you can easily use for your space solutions, for your interior proposals. Practical tools for your projects and your client's requirements.

For our fixtures, our designs are based on simplicity, minimalism and fresh ideas.

For the light, ...latest technologies.

Combining both targets, we have our in-house design team, harmonising both with practical solutions which anybody may apply in the day-to-day life. Additionally we cooperate also with external designers for new proposals.

DESIGN AND MANUFACTURING LIGHTING

Las nuevas tecnologías nos permiten hacer un estudio de la luz. La proyección de luz de un producto ya no está pensada únicamente para iluminar. Nuestros productos están pensados para cubrir las diferentes situaciones que se dan en un hábitat. El departamento de diseño crea las formas para convertirlos en objetos que aportan valor a la estancia.

La tecnología Led nos permite tener un ahorro energético y múltiples ventajas, por ello nuestro departamento está siempre alerta a las últimas tecnologías para adaptarlas a los diferentes productos que ofrecemos.

Ole! is our brand including collections manufactured at our factory FM ILUMINACION S.L. located nearby Valencia (Spain).

Our production design team motto: "simple solutions + latest technology".

Manufacturing to achieve our goals involves studying together material+light.

MATERIAL:

The right distinguished raw materials in the proper labour hands is a basic step for success. "Made in Spain" is the conclusion.

LIGHT:

We update and study the new technologies coming out constantly. Our target is adapting such technologies to new solutions.

LED technology is a key player in our laboratory of ideas.

We believe in quality. We believe in design. Made in Spain.

PROJECTS

OLE! con sus colecciones abarca proyectos singulares, dentro de un estilo contemporáneo. El tiempo nos ha dado respuesta a la perdurabilidad de nuestros diseños que se convierten en piezas atemporales aportando valor. La variedad de las colecciones facilita al decorador alternativas para alcanzar el concepto deseado. Al abordar un encargo se crea una estrecha colaboración con el estudio, la capacidad de respuesta y propuesta para llegar a satisfacer a nuestro cliente es algo vocacional, por lo que ponemos toda nuestra experiencia y profesionalidad para cumplir con las expectativas del cliente. En algunos casos se personaliza el producto a las exigencias del proyecto.

Our dealers sales net is scattering worldwide projects installed with our designs.

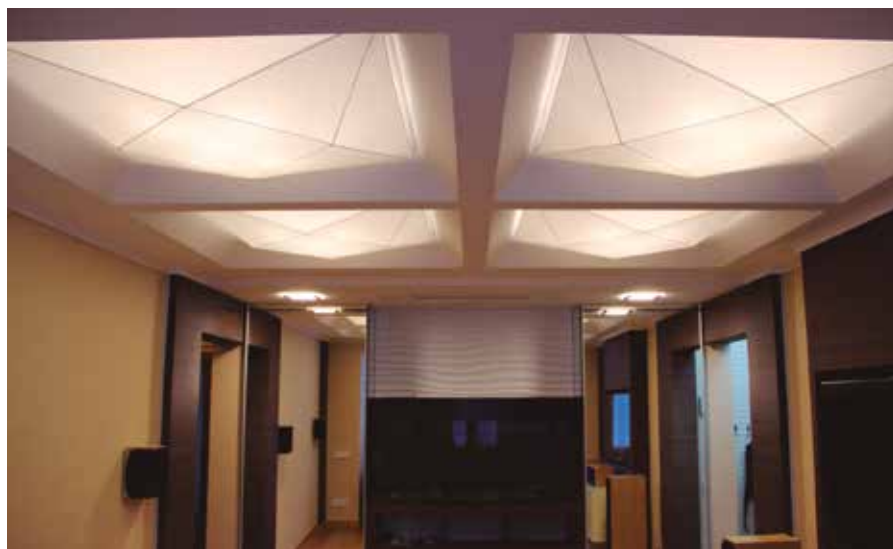

Combining your interior ideas and our designs, you have the solution here in your hand!

This 2015 Ole! general catalogue combines good well-known designs of success during years,... with newcomers, recently born designs in our laboratory of ideas, which we put now on your professional hands.

Many models with LED technology for most demanding professionals, but ... most important,... easy to use on daily life by non-professionals end-users.

Hope you like it!

Welcome to Ole!
